

This sample sentencing report contains actual data from the Lawstata proprietary database retrieved from publicly available sources.\*

At the order page a user provides parameters from their case enabling Lawstata to produce a report of similar cases from the Lawstata database. Below are parameters from a sample user and the resulting output of actual live data from the Lawstata database.

Ohio Revised Code Statute 1 = "2911.02" [ROBBERY (Taken from user's indictment paperwork or other available source)]

Total Indictment Counts = 2

Total Prior Cases = 0 [The total prior criminal cases the defendant has on his/her record]

These parameters enable Lawstata to produce a report with both identical and similar cases to those of the user.

Each report contains cases in which other defendants had either one less or one more Total Indictment Counts and one less or one more Total Prior Cases than entered above. This provides a range of valuable data that is similar to that which the user has in their own case.
